# Using Google Colab with GitHub

By Maria Ingold

5 November 2024

# **Google Colab**

## Loading the Notebook from GitHub

Go to Google Colab: <u>https://colab.research.google.com/</u>

On first open this shows.

| Upload         | >   | 2_AutoMPG_EDA.ipynb   |   |           |   |         |                  |
| + New notebool | k   |   |   |           |   |         | Cancel           |

## Add file to Google Colab session storage

Go to the folder icon and select the icon under Files and upload the file.

## **Editing on Google Colab**

Double click or enter and edit as:

- + Code
- + Text

## **Checking In**

Go to Save

## **First Use Configuration**

On first use configure connection.
